5th AXIS

PRODUCTION-READY WORKHOLDING

Industry-leading workholding & automation solutions.

- Quick-change & zero-point systems
- Exceptional precision and repeatability
- Increased machine utilization
- Designed for automated manufacturing

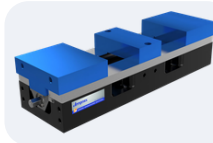

Jergens

MANUFACTURING EFFICIENCY

MADE IN THE USA WORKHOLDING

Complete solutions for secure part retention.

- Vises, fixtures, & clamp systems
- Quick-Loc® and Ball-Lock® technologies
- Modular and scalable solutions
- Improved setup efficiency

ROYAL

PRODUCTS

PRECISION TOOLHOLDING & WORKHOLDING

Innovative solutions that maximize machine performance.

- Quick-grip CNC collet chucks
- Expanding arbors and fixtures
- Improved concentricity & holding power
- Fast & repeatable setups

Kitagawa

POWER CHUCKS FOR TURNING

High-performance chucking solutions for production turning.

- Manual & power chuck systems
- Self-centering & independent jaw options
- High gripping accuracy
- Built for production turning

LANG

TECHNIK-USA

GERMAN PRECISION WORKHOLDING

Innovative solutions for 5-axis machining.

- Self-centering vises & fixtures
- Quick-change workholding systems
- Maximum accessibility for complex parts
- Increased machining efficiency

SCHUNK

POWER CHUCKS FOR TURNING

Flexible chucking technology for precise, repeatable turning.

- Versatile power chuck systems
- Multiple configurations for varied applications
- High clamping force & repeat accuracy
- Engineered for efficient CNC turning

PAWS WORKHOLDING

FLEXIBLE FIXTURING SOLUTIONS

Modular systems designed for maximum versatility.

- Multi-vise fixture plate systems
- Ideal for palletized machining
- Fast setup & changeovers
- Increased spindle uptime

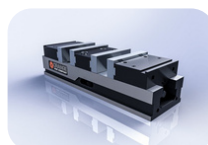

ORANGE

VICE COMPANY

HIGH-PRODUCTION VISE SYSTEMS

Precision workholding for demanding machining environments.

- Single & dual-station vises
- Quick-change jaw systems
- Exceptional rigidity & accuracy
- Built for production machining

NORTHFIELD

Precision Instrument Corporation

HIGH-PRECISION CHUCKING SOLUTIONS

Engineered for accuracy-critical applications.

- Precision air & manual chucks
- Collet & diaphragm systems
- Exceptional repeatability
- Ideal for complex components

LN

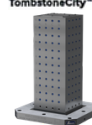

LYNDEX-NIKKEN

LN & HOWA POWER CHUCKS FOR TURNING

Performance-driven solutions for lathes.

- Hydraulic power chucks
- 2-jaw, 3-jaw, & specialty options
- Powerful clamping at high RPM
- Large through-hole options

MODULAR TOMBSTONE SOLUTIONS

Maximize productivity with flexible fixturing systems.

- Tombstones, angle plates, & cast sections
- Customizable workholding platforms
- Designed for horizontal machining centers
- Increase parts per setup
